Projects by College

Project   *Steganography Using Reversible Texture Synthesis*

- Designed and developed a clean and modern website using **C# , ASP .NET Framework**
- Optimized website for **speed and user experience**
- The purpose of this project is to securely hide secret data within synthesized textures, allowing both the original texture and hidden data to be perfectly recovered.
- On the receiver side, the hidden data is extracted from the synthesized texture, and the original texture is perfectly reconstructed, ensuring both the secret message and the original cover can be retrieved without any loss.

Certifications

- Udemy Certified HTML - The Complete Guide to HTML for Beginners
- Udemy Certified CSS - The Complete Guide to CSS for Beginners
